

Mini Keyboard NAMEREX WKB-185, wireless

Ergonomic ultra-thin light-weight keyboard with High-quality scissor-switch keys, Nordic layout

Size 285 x 120

Ultra-thin design, height 20/7 mm

Ergonomic benefits

- The mini or compact keyboard lets the mouse to be placed closer to the user body than a conventional full-size keyboards. The arm is relaxed because it does not stretch for the mouse (shoulder external rotation). Strain is also limited in lower arms and shoulders.
- High-quality scissor-switch keys provide good feedback when a key has been pressed.
- The light weight (only 307 g with batteries) makes the keyboard easily portable and transferable.
- The low keys make travels short, but the key travels are still easily noticeable.
- The sensitive keys require little force to press.

Other benefits

- Saves space on the desk compared to full-size keyboards.
- Quiet typing.
- The ultra-thin design saves space in bags.
- The USB mini receiver can be stored in the battery compartment.

Receiver storage fits comfortable in battery compartment
