Rock the revolutionary ergonomic mouse with hand for clicking

A suggestion from U.C. (University of California) Berkeley web:” Explore alternatives to mouse clicking. Often our customers report that moving the mouse is not a problem, but clicking it brings on pain.”

The Rocker Mouse brings an alternative to conventional mouse-clicking. The solution to the clicking stress caused by finger clicks is to use stronger hand.

Ergonomic benefits

The Rocker Mouse Rockstick2 reduces Carpal Tunnel Syndrome (CTS) problems in multiple ways.

- + Clicking is not done by fingers but by hand, rocking the mouse top to the left side or to the right side. Hands are stronger than fingers. Therefore hand movements cause less carpal tunnel pressure and tension than finger movements.
- + Strain from fingers lifting and hovering for preparation to click is avoided. The unique design of the Rocker Mouse allows users to rest their fingers on the mouse without the preparation to click. Thereby, all fingers remain relaxed and supported at all times.
- + An additional benefit is that when the user moves the mouse, the subconscious strain from being careful not to click unintentionally is avoided.
- + Strain from fingers lifting and hovering for preparation to click is avoided. The unique design of the Rocker Mouse allows users to rest their fingers on the mouse without the preparation to click. Thereby, all fingers remain relaxed and supported at all times.

- + The Rocker Mouse uses a vertical handshake posture, where twisting and strain on the related forearm muscles, tendons and nerves are avoided.
- + People allergic to rubber can use the Rocker mice with no harm. There is no latex or rubber in the Rocker mice.
- + The same Rocker Mouse can be used with the left and right hand. Thus the work load is reduced for both hands.
- + An extra-wide lip for the little finger reduces friction between it and the desk surface, lessening the force needed for movements.

Rocker Mouse has also other ergonomic benefits like:

- The Rocker Mouse has no glossy parts that can reflect disturbing sunlight or lamplight to the eyes.

Determination of mouse size

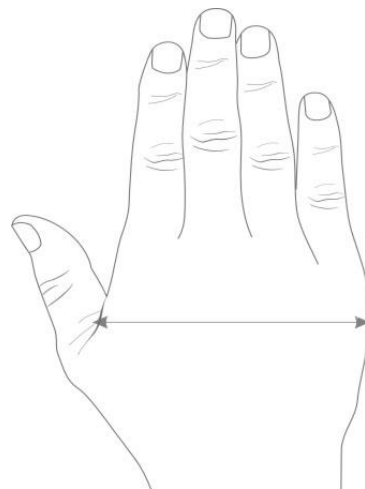

To determine size of mouse for best fit, measure the palm as shown in the drawing.

Medium/small size:

Recommended: 7.0-9.5 cm

Large size:

Recommended: 9.5-12.00 cm

Technical specification

- Wireless, 2.4 GHz
- Transmission up to 10m
- Handedness: left or right, selection by control at the bottom
- Laser resolution can be chosen: 800, 1200, 1600 or 2000 DPI
- Rubber allergy: materials are safe for rubber allergic people
- After a few minutes without usage the Rocker Mouse will sleep to save battery power.
- Guarantee: 3 years

Compatibility

- Windows 10, 8, 7, Vista, XP, 2000, or newer
- Mac OS 9, OS X (10.2.8 or newer)
- Linux
