

# Tablet Stand SlimCool

---

## Ergonomic benefits

Researchers have found that tablet users have a higher potential for “neck and shoulder discomfort” compared with using a notebook or a desktop computer. The worst way to use your tablet computer is on your lap. Whether you are watching a movie or typing, keeping your tablet on your lap places greater strain on your neck and shoulders, which can result in pain and potentially more serious posture issues in the long run.

Putting the tablet flat on a desk does not help you much because there is a natural tendency to hunch over the tablet.

- + Putting your tablet on a SlimCool with a height adjustment for viewing comfort lifts your tablet high off the table, allowing you to work with a straight back.

## Most unique benefits of SlimCool

- + Tablets can be positioned on SlimCool either horizontally or vertically thanks to the unique width adjustment enabled by the telescopic side bar design.
- + Ultra slim, easily portable. Only 18.2cm in width when folded.
- + The adjustable width also ensures sturdy support for tablets of varying sizes
- + Openings in the SlimCool base allow maximum air circulation to keep the tablet computer cool.
- + The bag is made of neoprene, which gives it the same classic protection against damage as tablet carrying cases – which are often made of the same material.
- + Height adjustable in 6 positions for viewing comfort.

## Environment-friendly materials

- + All components are 100% recyclable and under compliance with EU's RoHS directive.

## Technical specifications

Dimensions	Adjustable width 182-275 mm, height 250 mm
Weight	550 g
Max. load	30 kg
Material	Aluminium
Carry-case	Neoprene
Warranty	3 years

### Tip

This product also works excellently with laptops, e-book readers and documents.
