

Raised Mouse Mat UPLIFT

Maintains straight wrist posture when used with Forearm Rest or Wrist/Palm Rest

Ergonomic benefits

- + UPLIFT raises hand to ergonomically better position, avoiding the wrist from bending down from Forearm and Wrist/Palm Rest.
- + Raised Mouse Mats must not be exactly as high as Forearm Rest or Wrist/Palm Rest. First, both types of padded Rests give in under arms and hands. Secondly, the grip on mice is a bit higher than their bottoms against Mouse Mats.

Technical specification

	Uplift 20mm high
Lenght and width	18 x 22 cm
Surface	Fabric
Rottom	Non-slipping
Rubber allergy	Materials are safe for rubber allergic people

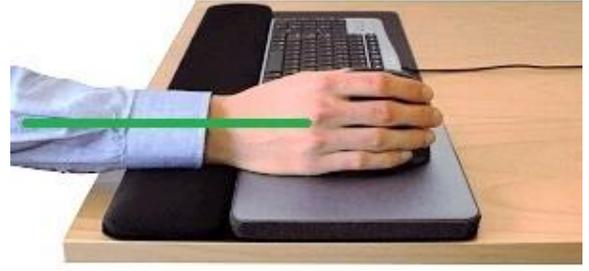

Product codes
