

Evoluent VerticalMouse 4 Right Bluetooth Mac

Evoluent – world's first and original vertical handshake-grip mouse

Ergonomic benefits

Avoids forearm twisting for comfort and good health*

The patented shape supports your hand in an upright neutral posture that generally avoids forearm twisting. Many users, including medical doctors, ergonomists and physical therapists, said the Evoluent VerticalMouse provides superior comfort and even relieved their wrist pain.*

Images of wired model in different colour

Comfortable and easy to use

The shape is thoughtfully sculpted for uncompromised comfort and easy-to-reach programmable buttons. No finger contortions are needed to operate the buttons.

Adjustable laser sensor

Pointer speed controls on the side allow convenient adjustment without even releasing your grip from the mouse.

Improved thumb rest

The thumb rest has been reshaped to provide even more comfort over earlier versions.

Pointer speed indicators

Top mounted LEDs show through the chrome thumb rest to indicate selected pointer speed including extra low (XL), low (LO), MD (medium), to high (HI).

Now two thumb buttons

A new bottom thumb button provides greatly extended functionality when used with the included driver.

Powerful and intuitive driver

Evoluent Mouse Manager for Mac provides extensive but easy to use functionality for 6 buttons through a simple and intuitive interface.

Extended lip prevents rubbing

An extra wide lip along the bottom edge prevents the last finger from rubbing the desk.

Bluetooth

Bluetooth connectivity

Connects to Mac systems via Bluetooth.

Horizontal Scroll

Evoluent VM4 has a special feature of horizontal scrolling. If you want to use it write us in which program (Microsoft Excel, Google Sheets) you want to take advantage of it and we will send you instructions concerned.

Compatibility

The old Evoluent software was certified to work with earlier versions of macOS, specifically 10.5, and 10.6-10.14. Since Mac computers automatically update their OS to later versions, the Evoluent software no longer works. Due to each macOS update requiring Evoluent to go through an intensive process to re-certify Evoluent's Mac software, Evoluent is no longer providing software for programming VerticalMouse Bluetooth and Mac models.

- Bluetooth connectivity with Mac only. Not compatible with Windows.
- Default mouse functions are supported in macOS.
- No Evoluent software is available for macOS versions other than 10.5 and 10.6–10.14.
- Third-party software for programming the buttons is available at www.usboverdrive.com (Evoluent is not affiliated with USB Overdrive.) The software is optional. VerticalMouse has default functionality without it.

Users who use only default functions

If the user has a newer macOS for which Evoluent don't have software, the user is advised to uninstall the Evoluent software. Then default functions work again.

Users who use button programming

The old Evoluent software was certified to work with earlier versions of macOS, specifically 10.5, and 10.6-10.14. If the user has a newer macOS for which Evoluent don't have software, the user is advised to uninstall Evoluent software and then install a third-party software for programming the buttons at www.usboverdrive.com. (Evoluent is not affiliated with USB Overdrive.)

Evoluent suits for those allergic to rubber

People allergic to rubber can use the Evoluent mice with no harm. There is no latex or rubber in the Evoluent mice. The scroll wheel, for example, is of silicone.

Install instructions

1. Before connecting Evoluent VerticalMouse, go to Applications folder to find and remove any existing Evoluent Mouse manager or any other mouse software, except touchpad drivers, to avoid software conflict.
2. Go to System Preferences, Bluetooth and click Setup New Device or click the plus sign + to add the mouse. Slide the power switch on the bottom of the VerticalMouse to the green position or cycle it off and on to establish a connection.
3. Press the Pointer Speed button on the side of the mouse to light up two to three indicator lights for optimal pointer speed.
4. The mouse has default functions without a driver. No Evoluent software is available for macOS versions other than 10.5 and 10.6–10.14 (Download [here \(Max OS X 10.5\)](#) or [here \(Mac OS X 10.6 - 10.14\)](#). For other macOS versions third-party software for programming the buttons is available at www.usboverdrive.com (Evoluent is not affiliated with USB Overdrive.) The software is optional. VerticalMouse has default functionality without it.
5. After the driver is installed, button functions may be changed by clicking the **E** icon in System Preferences to open Evoluent Mouse Manager for Mac. The driver may be removed by going to the Applications folder, Evoluent folder and clicking Uninstall.
6. Replace the AA battery when a red light on the thumb rest blinks, or when the pointer becomes unresponsive.

Approved mouse of University of California at Berkeley

The Evoluent VerticalMouse 2 (an earlier model identical in concept) was evaluated in 2007 by a team at the health services clinic in UC Berkeley, including medical doctors, physical therapists, ergonomists, and administrators. It was found to be comfortable, easily adapted to, and promote a neutral wrist and forearm posture. It was the only vertical type mouse approved for staff use within UC Berkeley and for sale in the campus store at that time.

* The statements herein apply to some current or past users of Evoluent VerticalMouse, but since everyone is different, Evoluent makes no claim or representation that the Evoluent VerticalMouse will prevent, cure, or mitigate any medical condition, disease, injury, pain or discomfort for all users.

Guarantee

Evoluent mice have a guarantee of 2 years.
